

CT5: CSE 201 - Object-Oriented Programming I: Java (Sec C)

Time: 15 min

Mark: 10

Name:

ID:

1. Write a multi-threaded java program where 3 threads (excluding main) will run [10]
parallelly. Each thread will generate 10 random numbers between **min** and **max** value
and print only the numbers that are divisible by 3. The values for **min** and **max** will be
passed while creating the Thread/Job. Take the values for **min** and **max** for 3 threads
from the user.

CT5: CSE 201 - Object-Oriented Programming I: Java (Sec C)

Mark: 10

Name:

ID:

1. Write a multi-threaded java program where 3 threads (excluding main) will run [10]
parallelly. Each thread will generate 10 random numbers between **0** and **max** value and
print only the odd numbers that are divisible by 3. The values for **max** will be passed
while creating the Thread/Job. Take the values for **max** for 3 threads from the user.

CT5: CSE 201 - Object-Oriented Programming I: Java (Sec D)

Time: 15 min

Mark: 10

Name:

ID:

1. Write a multi-threaded java program where 3 threads (excluding main) will run [10]
parallelly. Each thread will print 10 numbers that are divisible by **n** (you may start from
1), where **n** will be provided by the user for each thread. For first thread $n=2$, second
thread $n=3$ and for third thread $n=5$.

2. Write a multi-threaded java program where 3 threads (excluding main) will run parallelly. Each thread will generate 10 random numbers between **min** and **max** value and print only the odd numbers that are divisible by 3. The values for **min** and **max** will be passed while creating the Thread/Job. Take the values for **min** and **max** for 3 threads from the user.

CT5: CSE 201 - Object-Oriented Programming I: Java (Sec E)

Time: 15 min

Mark: 10

Name:

ID:

1. Write a multi-threaded java program where 3 threads (excluding main) will run parallelly. Each thread will generate 20 random numbers between **0** and **max** value, calculate the summation and print the summation. The value of **max** will be passed while creating the Thread/Job. Take the values for **max** for 3 threads from the user.

CT5: CSE 201 - Object-Oriented Programming I: Java (Sec E)

Time: 15 min

Mark: 10

Name:

ID:

1. Write a multi-threaded java program where 3 threads (excluding main) will run parallelly. Each thread will print all even numbers between **min** and **max**. The values for **min** and **max** will be passed while creating the Thread/Job. Take the values for **min** and **max** for 3 threads from the user.
